SUMMARY

As a recent Informatics Engineering graduate, I hold a Bachelor's degree and have gained practical experience in software development, coding, and graphic design. I am capable of working both independently and in a team. Currently, I am building my interest in AI development (artificial intelligence), deep learning, and machine learning, such as object detection, face recognition, and image or video classification, while occasionally exploring DevOps in my free time. I've always been passionate about technology and digital developments and eager to continuously learn new things in order to adapt and make a real contribution to the industry.

EXPERIENCES

Phoneshop Employee – Part Time **November 2021 – November 2025**

NST Phoneshop *On-site, Bintan Timur, Riau Islands*

My first real-work experience was as an employee at a smartphone store called NST Phoneshop during my college years. My responsibilities and contributions in this work include:

- Providing direct customer service
- Maintaining the security of the store and ensuring all units are in good and safe condition
- Ensuring the store is always in clean condition
- Work as a team with sales to prevent miscommunication with the customers.
- Maintaining customer trust in the Phoneshop brand

Full-Stack Web Developer – Intership **July 2024 – August 2024**

Kantor Camat *On-site, Bintan Timur, Riau Islands*

My role as a full-stack web developer, I was responsible for creating SIMPENAN collaborated with the team to create a web-based platform aimed at simplifying and digitiz the public's file archiving process for institutional use. My responsibilities and contributions in this work include:

- Building three websites for institutional needs (subdistrict profile portal, web-based archive system SIMANTAP and SIMPENAN).
- Designed, developed, and implemented "SIMPENAN," a full-stack web application to digitize the entire archival process.
- Successfully improved data accessibility and security by digitized all archived data into MySQL database, increase overall efficiency for the institution.
- Led a team to complete the project on time during a 2-month internship.

IBM AI & Cybersecurity Mentee – Certified Independent Study August 2023 – December 2023

Infinite Learning, PT Kinema Systrans Multimedia *Hybrid, Tanjungpinang & Batam, Riau Islands*

As a Mentee, I was required to participate in a 6-month intensive hybrid independent study program (5 months online and 1 month on-site). My responsibilities and accomplishments in this study include:

- Specialized in IBM AI and Cybersecurity and Red Hat Certified System Administrator (RHCSA)
- Completed a comprehensive 6-month course in IBM AI and Cyber Security and Red Hat Enterprise Linux (RHEL)
- Achieved Red Hat Certified System Administrator (RHCSA) certification, demonstrating expertise in Linux administration, automation, and troubleshooting.
- Designed, developed "Cancare," and implemented a generative AI-based virtual assistant capstone project provided by IBM Watsonx.ai.
- Successfully completed three intensive and concurrent technology concentrations: System Administration, IBM AI, and IBM Cybersecurity.
- Successfully participated in an intensive independent study program focused on AI and Cybersecurity under the guidance of Infinite Learning Indonesia, fully funded by the Ministry of Education, Culture, Research, and Technology of Indonesia.

FrontEnd Developer - Freelance **October 2022 – January 2023**

Tanjungpinang City Education Department *Remote , Tanjungpinang, Riau Islands*

My role as FrontEnd developer, I was responsible for creating SICERDIK, a web-based platform that simplifies and digitizes the student school transfer process. My responsibilities and contributions in this work include:

- Working closely with developers and backend developer to contribute to the app's workflow and design process.
- Leveraged JavaScript, MongoDB, and React.js to develop and construct dynamic and responsive websites with my team.

EDUCATION

Universitas Maritim Raja Ali Haji **2021 - 2026**

Bachelor of Engineering (BEng) in Informatics Engineering | GPA : 3.55 / 4.00

Thesis : Analysis and Implementation of Transfer Learning to Identifying Deepfake Videos using EfficientNet Model.

ORGANIZATION EXPERIENCE

Informatics Engineering Student Association **September 2022 – June 2023**

Member of Press & Information Division

- Actively involved in various events and activities held by student association and campus.
- Responsible for creating and designing educational and informative faculty related content on the social media platforms.
- Educating and presenting verified (factual) and balanced information to counter fake news circulating around campus environment
- Provide the latest news and information on campus, social and cultural issues relevant to students.
- Monitoring, critiquing, and providing input on campus policies (rectorate/faculty) and public policies to ensure they support the interests of students and the community.
- Aspiration Platform, functions as a means for students to voice their complaints, suggestions and criticisms.

KJM Sempena FTTK UMRAH **November 2022 – December 2023**

Member of Visual Communication Design (DKV) Department

- Responsible for producing digital graphic assets for SEMPENA publications and the Faculty of Engineering.
- Designing creative visual content such as greeting posters, news infographics, illustration and other materials.
- Collaborating with fellow members to create and disseminate engaging and informative content that kept the university community informed about important events and updates.
- Managing the organization's standards and identity in all published design work.

Computer Cyber Study Club **November 2021 – October 2022**

Member of Multimedia Division

- Developed and maintained the club's visual identity across all platforms.
- Create digital visual assets, including event posters, logos, infographics, and content for organization's internal used and university events.
- Produced and edited motion graphics and video using editing software.

PROJECTS

DEFEND : Deepfake Efficient Detector (Thesis Project)

Technology Used : Deep Learning, Python, MTCNN, OpenCV, NumPy, Streamlit.

NST E-Catalog

Technology Used : ReactJS, ViteJs Tailwind CSS, Typescript, SupaBase.

SIMPENAN : Sistem Informasi Penyimpanan dan Pengarsipan

Technology Used : PHP, HMTL, CSS, Javascript, MySQL.

PalVoice : Palestine Voice

Technology Used : Flutter, Dart, NewsAPI, Firebase, Cloud Firestore

UMKM Web

Technology Used : HTML, Javascript, CSS

SICERDIK App

Technology Used : ReactJS, ExpressJS, MongoDB, RestAPI.

Cancare : A Virtual Assistant for Cancer Patient

Technology Used : Watson Assistant, Virtual Assistant, IBM Watsonx.AI.

Capstone Design Project

Technology Used : Autodesk 3D Max

CERTIFICATION

- **Red Hat® Certified System Administrator (RHCSA®)**
  Red Hat | Score: 300/300 | Issued: Dec 2023 – Expires: Dec 2026

SKILLS

Programming Skill :

- Programming Languages : C, C++, PHP, Python, Javascript, Typescript, PHP
- Frontend Development : ReactJS, Codeigniter, Laravel, Tailwind
- Backend Development : NodeJS, ExpressJS
- Mobile Development : Flutter, Dart
- Databases : MySQL, MongoDB
- Version Control : Git, Github
- Web Design : HTML, CSS, Javascript
- ML & DL : Scikit-learn, Tensorflow, Pytorch
- UI/UX : Figma

Additional Skill :

- Graphic Design : Adobe Photoshop, Ilustrator, Canva
- Video Editing : Capcut, Kinemaster
- 3D Modelling : Blender, Autocad, Autodesk 3D Max
- Other : Microsoft Office (Word, Powerpoint, Excel), Prompt

LANGUAGES

Indonesia : Native Proficiency
English : Professional Working Proficiency

Best Regard,

MUHAMMAD DHAOED ARRAZAQ
